**ALL** STARS students and faculty have the opportunity to present scholarly work (e.g. conference abstracts, posters) for peer mentoring and feedback.

**MARCH/APRIL 2024**  
**SEPTEMBER/OCTOBER 2024**

**Featured Outcomes of the  
STARS Program**

**More than 600 U.S. medical student participants** from **>50 different U.S. medical schools** over the first 6 STARS (U.S.) cohorts. This growing network of medical students, graduates (current residents) and faculty reaches across the US and different clinical specialties!

**26 Abstracts** submitted from STARS students to the **2023 High Value Practice Alliance National Conference!** STARS faculty have supported projects, abstract development, and will host special sessions at the conference.

**100% of STARS faculty** who responded to an anonymous survey (2022) said they **"would recommend** participating in the STARS program to other medical schools/faculty."

STARS who applied to residency in 2021-2023 reported:

- Including STARS on their residency application and talking about it during their interviews;
- **100%** of respondents agreed they "feel the exposure to the STARS program had a positive effect on how I will practice medicine as a resident."

**What STARS Participants Say:**

"The experience was a leadership opportunity that made me favorable for residency programs." – *2023 Graduating (MS4) STARS Student*

"Being in the STARS program critically shaped my medical school experience and the type of physician I plan to become...I've built a strong national network of likeminded physicians, medical students, and allied health professionals." – *2022 Graduating (MS4) STARS Student*

"The STARS program serves as the infrastructure to engage students and fellow faculty in HVC educational/curricular development as well as program initiatives...I have personally benefitted as a faculty sponsor through networking and academic career advancement opportunities (i.e. promotion and tenure)." – *STARS Faculty, 2022 Anonymous Survey*

"I love the fact it isn't a one-off conference - that we get to build something over the coming months and make a meaningful impact on the paradigm of medical education." – *2021 STARS Student*
